

TURFSCRUB™

BRUSH TYPE FLOOR PAD

For use on Standard Speed Floor Machines*, Automatic Scrubbers and Oscillating Floor Machines.

*Conventional machines up to 500 rpm.

Also available in 4.5" x 10" size for use on utility pad holders.

The pad that gets down into the cracks and crevices of uneven floor surfaces and deep grout lines for unsurpassed cleaning results.

The **TURFSCRUB™** provides brush scrubbing action in a pad. Now there is no need for expensive brushes and the time consuming process of changing cumbersome brush driver blocks when you want to scrub uneven surfaces and clean deep grout lines.

- The **TURFSCRUB™** pad is constructed of heavy duty turf material for exceptional cleaning performance and long life.
- No harsh chemicals needed. Cleans with water or neutral cleaning solution.
- **TURFSCRUB™** pads are not laminated. This allows for the unobstructed flow of water or cleaning solution when using an auto scrubber.
- Superior construction, with no serged borders, provides "edge to edge" cleaning power.

Ideal for:

- Grouted Tile • Terrazzo • Concrete

FAQ

TURFSCRUB™ BRUSH TYPE FLOOR PAD

Is it a Brush or a Pad?

TURFSCRUB™ works like a brush with its coarse bristles by aggressively cleaning hard to reach areas, such as tile, concrete and grout but with the convenience of a pad! **TURFSCRUB™** is more cost-effective than utilizing traditional brushes or replacing expensive brush driver blocks. This unique pad is designed to be both flexible and lightweight for easier application and alternating with traditional floor pads when the application requires multiple pad types.

What types of floors can I clean with the TURFSCRUB™?

TURFSCRUB™ is ideal for a variety of floors, including: concrete, terrazzo, deep grouted tile and other unlevel surfaces.

What is the life expectancy of these pads?

Used on the proper floor types, you can expect to get up to 300,000 square feet. Superior construction, with no serged borders, provides “edge to edge” cleaning power. Of course preventing soil from drying on the pad, along with proper cleaning after every use will prolong the life of these pads.

How do I clean the TURFSCRUB™ pad?

The pad should be thoroughly cleaned after each use to prolong its life and efficiency. Flush out dirt and debris with a high pressure garden hose. Use hot water if available. To dry, stand the pad on its edge and prop against a wall or rack. This allows the water to completely drain from the pad and promotes faster drying.

Note: Do not use commercial washing machines or dryers

The **TURFSCRUB™** pad is ideal for cleaning uneven surfaces. The bristly texture of this pad gets down into deep grout lines and rough surfaces for thorough cleaning.

What types of machines can I use?

The **TURFSCRUB™** pad fits standard speed floor machines*, automatic scrubbers and oscillating floor machines. This pad’s open construction allows water to flow through to the surface for optimal scrubbing action to produce maximum results every time.

*Conventional machines up to 500 rpm.

Round Pad (diameter)		Rectangular Pad		Octopus Pads	
Pad Size	Pack	Pad Size	Pack	Pad Size	Pack
8"	4/cs.	12" x 18"	4/cs.	4.5" x 10"	4/cs.
